Leading U.S. Government-Accredited Lab Confirms Path-Away(R) Nat

Leading U.S. Government-Accredited Lab Confirms Path-Away(R) Natural Active Ingredient Can Kill Actual COVID-19 Virus Within Two Minutes, First In The World

Sydney, Kuala Lumpur, Bluffton, SC (USA), Oct 20, 2020 - (ACN Newswire) - A leading laboratory accredited with U.S. Government agencies has released test results which confirm that Path-Away(R) - a plant-based active ingredient that contains no chemicals or alcohol - can kill the actual virus that causes COVID-19 within two minutes, the global distributor of Path-Away(R) announced today.

Holista Colltech Limited (ASX: HCT, or Holista), the Malaysian-based global distributor, and Global Infection Control Consultants, LLC (GICC LLC), the developer of Path-Away(R), said they believe the tests confirm the active ingredient to be the world's first totally natural and safe organic disinfectant to meet the U.S. testing standard.

The independent tests of the Path-Away(R) Anti-Pathogenic Aerosol Solution on SARS

Below the search bar, there is a navigation menu with options like "Home", "Search", "Alerts", "Newsletters", "Analytics", "News Pages", "Companies/Markets", and "Labs". The main content area displays a search result for a news article titled "Leading U.S. Government-Accredited Lab Confirms Path-Away(R) Natural Active Ingredient Can Kill Actual COVID-19 Virus Within Two Minutes, First In The World". The article is dated "20 October 2020 19:00" and is from "ACN Newswire". The text of the article describes how a plant-based active ingredient can kill the actual virus that causes COVID-19 within two minutes, as confirmed by a leading laboratory accredited with U.S. Government agencies. The article also mentions that the tests were conducted by Microbac Laboratories, Inc. and that the active ingredient is being used in a hand sanitizer and a nasal balm. The article is listed on the Australia Securities Exchange (ASX) and is expected to be launched before the end of 2020. Sydney, Kuala Lumpur, Bluffton, SC (USA), Oct 20, 2020 - (ACN Newswire) - A leading laboratory accredited with U.S. Government agencies has released test results which confirm that Path-Away(R) - a plant-based active ingredient that contains no chemicals or alcohol - can kill the actual virus that causes COVID-19 within two minutes, the global distributor of Path-Away(R) announced today.

Holista Coltech Limited (ASX: HCT, or Holista), the Malaysian-based global distributor, and Global Infection Control Consultants, LLC (GICC LLC), the developer of Path-Away(R), said they believe the tests confirm the active ingredient to be the world's first totally natural and safe organic disinfectant to meet the U.S. testing standard.

The independent tests of the Path-Away(R) Anti Pathogenic Aerosol Solution on SARS-CoV-2, the actual virus that causes COVID-19, were undertaken by Microbac Laboratories, Inc. (Microbac) in the United States. With over 50 years' experience, Microbac is accredited under the U.S. Department of Defence (DoD) and Environmental Laboratory Accreditation Program (ELAP).

The Microbac tests were conducted using the direct inoculation method and follow successful tests in an approved laboratory in the United Kingdom (completed in April 2020) of the efficacy of Path-Away(R) against the feline coronavirus which is a recognised surrogate of SARS-CoV-2. Path-Away(R) has also proven to be effective against a broad spectrum of microbes including the SARS and the H1N1 viruses.

Listed on the Australia Securities Exchange (ASX), Holista distributes Path-Away(R) under its own NatShield(TM) and Protectene(TM) brands. Apart from a hand sanitiser, Holista and GICC LLC are also co-developing a NatShield(TM) nasal balm that will include Path-Away(R). This balm is expected to be launched before the end of 2020.

The latest test results will significantly accelerate efforts to roll out the M3 System(R), also developed by GICC LLC, which can disinfect large buildings by dispensing Path-Away(R) through heating, ventilation and air-conditioning ("HVAC") systems to treat harmful pathogens, including airborne viruses.

GICC LLC, based in Bluffton, South Carolina, has recently secured a 36-month contract with the U.S. Government to manufacture and install up to 10 million units of its M3 System(R) in large buildings. The system

Leading U.S. Government-Accredited Lab Confirms Path-Away(R) Natural Active Ingredient Can Kill Actual COVID-19 Virus Within Two Minutes, First In The World
ACN Newswire (Published: 19-Oct 2020 22:00, Received: 23:14:18)
Word Count: 1172

Sydney, Kuala Lumpur, Bluffton, SC (USA), Oct 20, 2020 - (ACN Newswire) - A leading laboratory accredited with U.S. Government agencies has released test results which confirm that Path-Away(R) - a plant-based active ingredient that contains no chemicals or alcohol - can kill the actual virus that causes COVID-19 within two minutes, the global distributor of Path-Away(R) announced today.

Holista Colltech Limited (ASX: HCT, or Holista), the Malaysian-based global distributor, and Global Infection Control Consultants, LLC (GICC LLC), the developer of Path-Away(R), said they believe the tests confirm the active ingredient to be the world's first totally natural and safe organic disinfectant to meet the U.S. testing standard.

The independent tests of the Path-Away(R) Anti Pathogenic Aerosol Solution on SARS-CoV-2, the actual virus that causes COVID-19, were undertaken by Microbac Laboratories, Inc. (Microbac) in the United States. With over 50 years' experience, Microbac is accredited under the U.S. Department of Defence (DoD) and Environmental Laboratory Accreditation Program (ELAP).

The Microbac tests were conducted using the direct inoculation method and follow successful tests in an approved laboratory in the United Kingdom (completed in April 2020) of the efficacy of Path-Away(R) against the feline coronavirus which is a recognised surrogate of SARS-CoV-2. Path-Away(R) has also proven to be effective against a broad spectrum of microbes including the SARS and the H1N1 viruses.

Listed on the Australia Securities Exchange (ASX), Holista distributes Path-Away(R) under its own NatShield(TM) and Protectene(TM) brands. Apart from a hand sanitiser, Holista and GICC LLC are also co-developing a NatShield(TM) nasal balm that will include Path-Away(R). This balm is expected to be launched before the end of 2020.

The latest test results will significantly accelerate efforts to roll out the M3 System(R), also developed by GICC LLC, which can disinfect large buildings by dispensing Path-Away(R) through heating, ventilation and air-conditioning ("HVAC") systems to treat harmful pathogens, including airborne viruses.

GICC LLC, based in Bluffton, South Carolina, has recently secured a 36-month contract with the U.S. Government to manufacture and install up to 10 million units of its M3 System(R) in large buildings. The system measures, monitors and contains airborne (aerosol) viruses, pathogens and other biological contaminants.

Holista and GICC LLC concurrently announced that they will form a 51:49 joint-venture company in Singapore which will have the rights to manufacture the M3 System(R) outside the United States. Holista is exclusive global distributor of the M3 System(R) excluding the United States, China and the Gulf states.

Apart from global distribution rights of Path-Away(R) for use as a sanitiser under the NatShield(TM) and Protectene(TM) brands, Holista also has rights to distribute Path-Away(R) for use in aerosolised disinfection of buildings using a high-pressure fogger.

Dr Arthur V Martin, the president of GICC LLC, commented: "To the best of my knowledge, this is the first time a completely natural, all-organic compound has been successfully proven to kill the actual virus causing COVID-19, to 99.9% within two minutes. We are excited because this will allow us to speed up the formal U.S. Government process of listing on the Environmental Protection Agency's (EPA) "N-List". EPA expects the products on "List N" to kill SARS-CoV-2 within two minutes. This will also allow for a wider use of this all-natural disinfectant for human use. The findings by Microbac confirm what we have known about the effectiveness of Path-Away(R) on other coronaviruses. The results are also particularly pleasing in light of recent research that showed that COVID-19 can survive on surfaces far longer than scientists had originally calculated."

Leading U.S. Government-Accredited Lab Confirms Path-Away(R) Natural Active Ingredient Can Kill Actual COVID-19 Virus Within Two Minutes, First In The World
ACN Newswire
2020-10-20

HOLISTA COLLTECH

Sydney, Kuala Lumpur, Bluffton, SC (USA), Oct 20, 2020 - (ACN Newswire) - A leading laboratory accredited with U.S. Government agencies has released test results which confirm that Path-Away® - a plant-based active ingredient that contains no chemicals or alcohol - can kill the actual virus that causes COVID-19 within two minutes, the global distributor of Path-Away® announced today.

Holista Colltech Limited (ASX: HCT, or Holista), the Malaysian-based global distributor, and Global Infection Control Consultants, LLC (GICC LLC), the developer of Path-Away®, said they believe the tests confirm the active ingredient to be the world's first totally natural and safe organic disinfectant to meet the U.S. testing standard.

The independent tests of the Path-Away® Anti Pathogenic Aerosol Solution on SARS-CoV-2, the actual virus that causes COVID-19, were undertaken by Microbac Laboratories, Inc. (Microbac) in the United States. With over 50 years' experience, Microbac is accredited under the U.S. Department of Defence (DoD) and Environmental Laboratory Accreditation Program (ELAP).

The Microbac tests were conducted using the direct inoculation method and follow successful tests in an approved laboratory in the United Kingdom (completed in April 2020) of the efficacy of Path-Away® against the feline coronavirus which is a recognised surrogate of SARS-CoV-2. Path-Away® has also proven to be effective against a broad spectrum of microbes including the SARS and the H1N1 viruses.

Listed on the Australia Securities Exchange (ASX), Holista distributes Path-Away® under its own NatShield™ and Protectene™ brands. Apart from a hand sanitiser, Holista and GICC LLC are also co-developing a NatShield™ nasal balm that will include Path-Away®. This balm is expected to be launched before the end of 2020.

The latest test results will significantly accelerate efforts to roll out the M3 System®, also developed by GICC LLC, which can disinfect large buildings by dispensing Path-Away® through heating, ventilation and air-conditioning ("HVAC") systems to treat harmful pathogens, including airborne viruses.

GICC LLC, based in Bluffton, South Carolina, has recently secured a 36-month contract with the U.S. Government to manufacture and install up to 10 million units of its M3 System® in large buildings. The system measures, monitors and contains airborne (aerosol) viruses, pathogens and other biological contaminants.

Holista and GICC LLC concurrently announced that they will form a 51:49 joint-venture company in Singapore which will have the rights to manufacture the M3 System® outside

Leading U.S. Government-Accredited Lab Confirms Path-Away(R) Natural Active Ingredient Can Kill Actual COVID-19 Virus Within Two Minutes, First In The World

JCN Newswire
20日12時00分

Sydney, Kuala Lumpur, Bluffton, SC (USA), 2020年10月20日 - (JCN Newswire) - A leading laboratory accredited with U.S. Government agencies has released test results which confirm that Path-Away®; - a plant-based active ingredient that contains no chemicals or alcohol - can kill the actual virus that causes COVID-19 within two minutes, the global distributor of Path-Away®; announced today.

Holista Colltech Limited (ASX: HCT, or Holista), the Malaysian-based global distributor, and Global Infection Control Consultants, LLC (GICC LLC), the developer of Path-Away®;, said they believe the tests confirm the active ingredient to be the world's first totally natural and safe organic disinfectant to meet the U.S. testing standard.

The independent tests of the Path-Away®; Anti Pathogenic Aerosol Solution on SARS-CoV-2, the actual virus that causes COVID-19, were undertaken by Microbac Laboratories, Inc. (Microbac) in the United States. With over 50 years' experience, Microbac is accredited under the U.S. Department of Defence (DoD) and Environmental Laboratory Accreditation Program (ELAP).

The Microbac tests were conducted using the direct inoculation method and follow successful tests in an approved laboratory in the United Kingdom (completed in April 2020) of the efficacy of Path-Away®; against the feline coronavirus which is a recognised surrogate of SARS-CoV-2. Path-Away®; has also proven to be effective against a broad spectrum of microbes including the SARS and the H1N1 viruses.

Listed on the Australia Securities Exchange (ASX), Holista distributes Path-Away®; under its own NatShield®; and Protectene®; brands. Apart from a hand sanitiser, Holista and GICC LLC are also co-developing a NatShield®; nasal balm that will include Path-Away®;. This balm is expected to be launched before the end of 2020.

The latest test results will significantly accelerate efforts to roll out the M3 System®;, also developed by GICC LLC, which can disinfect large buildings by dispensing Path-Away®; through heating, ventilation and air-conditioning ("HVAC") systems to treat harmful pathogens, including airborne viruses.

GICC LLC, based in Bluffton, South Carolina, has recently secured a 36-month contract with the U.S. Government to manufacture and install up to 10 million units of its M3 System®; in large buildings. The system measures, monitors and contains airborne (aerosol) viruses, pathogens and other biological contaminants.

2020年10月20日

Sydney, Kuala Lumpur, Bluffton, SC (USA), Oct 20, 2020 - (JCN Newswire) - A leading laboratory accredited with U.S. Government agencies has released test results which confirm that Path-Away® - a plant-based active ingredient that contains no chemicals or alcohol - can kill the actual virus that causes COVID-19 within two minutes, the global distributor of Path-Away® announced today.

Holista Colltech Limited (ASX: HCT, or Holista), the Malaysian-based global distributor, and Global Infection Control Consultants, LLC (GICC LLC), the developer of Path-Away®, said they believe the tests confirm the active ingredient to be the world's first totally natural and safe organic disinfectant to meet the U.S. testing standard.

The independent tests of the Path-Away® Anti Pathogenic Aerosol Solution on SARS-CoV-2, the actual virus that causes COVID-19, were undertaken by Microbac Laboratories, Inc. (Microba

Leading U.S. Government-Accredited Lab Confirms Path-Away(R) Natural Active Ingredient Can Kill Actual COVID-19 Virus Within ...

20/10/2020 4:00am
JCN Newswire

A leading laboratory accredited with U.S. Government agencies has released test results which confirm that Path-Away® - a plant-based active ingredient that contains no chemicals or alcohol - can kill the actual virus that causes COVID-19 within two minutes, the global distributor of Path-Away®, announced today.

Holista Colltech Limited (ASX: HCT, or Holista), the Malaysian-based global distributor, and Global Infection Control Consultants, LLC (GICC LLC), the developer of Path-Away®, said they believe the tests confirm the active ingredient to be the world's first totally natural and safe organic disinfectant to meet the U.S. testing standard.

The independent tests of the Path-Away® Anti Pathogenic Aerosol Solution on SARS-CoV-2, the actual virus that causes COVID-19, were undertaken by Microbac Laboratories, Inc. (Microbac) in the United States. With over 50 years' experience, Microbac is accredited under the U.S. Department of Defence (DoD) and Environmental Laboratory Accreditation Program (ELAP).

The Microbac tests were conducted using the direct inoculation method and follow successful tests in an approved laboratory in the United Kingdom (completed in April 2020) of the efficacy of Path-Away® against the feline coronavirus which is a recognised surrogate of SARS-CoV-2. Path-Away® has also proven to be effective against a broad spectrum of microbes including the SARS and the H1N1 viruses.

Listed on the Australia Securities Exchange (ASX), Holista distributes Path-Away® under its own NatShield® and Protectene® brands. Apart from a hand sanitiser, Holista and GICC LLC are also co-developing a NatShield® nasal balm that will include Path-Away®. This balm is expected to be launched before the end of 2020.

The latest test results will significantly accelerate efforts to roll out the M3 System®, also developed by GICC LLC, which can disinfect large buildings by dispensing Path-Away® through heating, ventilation and air-conditioning ("HVAC") systems to treat harmful pathogens, including airborne viruses.

Leading U.S. Government-Accredited Lab Confirms Path-Away(R) Natural Active Ingredient Can Kill Actual COVID-19 Virus Within Two Minutes, First In The World

HOLISTA COLLTECH

Sydney, Kuala Lumpur, Bluffton, SC (USA), Oct 20, 2020 - (ACN Newswire) - A leading laboratory accredited with U.S. Government agencies has released test results which confirm that Path-Away(R) - a plant-based active ingredient that contains no chemicals or alcohol - can kill the actual virus that causes COVID-19 within two minutes, the global distributor of Path-Away(R) announced today.

Holista Colltech Limited (ASX: HCT, or Holista), the Malaysian-based global distributor, and Global Infection Control Consultants, LLC (GICC LLC), the developer of Path-Away(R), said they believe the tests confirm the active ingredient to be the world's first totally natural and safe organic disinfectant to meet the U.S. testing standard.

Leading U.S. Government-Accredited Lab Confirms Path-Away(R) Natural Active Ingredient Can Kill Actual COVID-19 Virus Within Two Minutes, First In The World

HOLISTA COLLTECH

Sydney, Kuala Lumpur, Bluffton, SC (USA), Oct 20, 2020 - (ACN Newswire) - A leading laboratory accredited with U.S. Government agencies has released test results which confirm that Path-Away(R) - a plant-based active ingredient that contains no chemicals or alcohol - can kill the actual virus that causes COVID-19 within two minutes, the global distributor of Path-Away(R) announced today.

Holista Colltech Limited (ASX: HCT, or Holista), the Malaysian-based global distributor, and Global Infection Control Consultants, LLC (GICC LLC), the developer of Path-Away(R), said they believe the tests confirm the active ingredient to be the world's first totally natural and safe organic disinfectant to meet the U.S. testing standard.

The independent tests of the Path-Away(R) Anti Pathogenic Aerosol Solution on SARS-CoV-2, the actual virus that causes COVID-19, were undertaken by Microbac Laboratories, Inc. (Microbac) in the United States. With over 50 years' experience, Microbac is accredited under the U.S. Department of Defence (DoD) and Environmental Laboratory Accreditation Program (ELAP).

The Microbac tests were conducted using the direct inoculation method and follow successful tests in an approved laboratory in the United Kingdom (completed in April 2020) of the efficacy of Path-Away(R) against the feline coronavirus which is a recognised surrogate of SARS-CoV-2. Path-Away(R) has also proven to be effective against a broad spectrum of microbes including the SARS and the H1N1 viruses.

Listed on the Australia Securities Exchange (ASX), Holista distributes Path-Away(R) under its own NatShield and Protectene brands. Apart from a hand sanitiser, Holista and GICC LLC are also co-developing a NatShield nasal balm that will include Path-Away(R). This balm is expected to be launched before the end of 2020.

The latest test results will significantly accelerate efforts to roll out the M3 System(R), also developed by GICC LLC, which can disinfect large buildings by dispensing Path-Away(R) through heating, ventilation and air-conditioning ("HVAC") systems to treat harmful pathogens, including airborne viruses.

GICC LLC, based in Bluffton, South Carolina, has recently secured a 36-month contract with the U.S. Government to manufacture and install up to 10 million units of its M3 System(R) in large buildings. The system measures, monitors and contains airborne (aerosol) viruses, pathogens and other biological contaminants.

Holista and GICC LLC concurrently announced that they will form a 51:49 joint-venture company in Singapore which will have the rights to manufacture the M3 System(R) outside the United States. Holista is exclusive global distributor of the M3 System(R).

Leading U.S. Government-Accredited Lab Confirms Path-Away(R) Natural Active Ingredient Can Kill Actual COVID-19 Virus Within Two Minutes, First In The World

By: ACN Newswire October 20, 2020 at 07:00 AM EDT

Sydney, Kuala Lumpur, Bluffton, SC (USA), Oct 20, 2020 - (ACN Newswire) - A leading laboratory accredited with U.S. Government agencies has released test results which confirm that Path-Away(R) - a plant-based active ingredient that contains no chemicals or alcohol - can kill the actual virus that causes COVID-19 within two minutes, the global distributor of Path-Away(R) announced today.

Holista Colltech Limited (ASX: HCT, or Holista), the Malaysian-based global distributor, and Global Infection Control Consultants, LLC (GICC LLC), the developer of Path-Away(R), said they believe the tests confirm the active ingredient to be the world's first totally natural and safe organic disinfectant to meet the U.S. testing standard.

The independent tests of the Path-Away(R) Anti Pathogenic Aerosol Solution on SARS-CoV-2, the actual virus that causes COVID-19, were undertaken by Microbac Laboratories, Inc. (Microbac) in the United States. With over 50 years' experience, Microbac is accredited under the U.S. Department of Defence (DoD) and Environmental Laboratory Accreditation Program (ELAP).

The Microbac tests were conducted using the direct inoculation method and follow successful tests in an approved laboratory in the United Kingdom (completed in April 2020) of the efficacy of Path-Away(R) against the feline coronavirus which is a recognised surrogate of SARS-CoV-2. Path-Away(R) has also proven to be effective against a broad spectrum of microbes including the SARS and the H1N1 viruses.

Listed on the Australia Securities Exchange (ASX), Holista distributes Path-Away(R) under its own NatShield(TM) and Protectene(TM) brands. Apart from a hand sanitiser, Holista and GICC LLC are also co-developing a NatShield(TM) nasal balm that will include Path-Away(R). This balm is expected to be launched before the end of 2020.

The latest test results will significantly accelerate efforts to roll out the M3 System(R), also developed by GICC LLC, which can disinfect large buildings by dispensing Path-Away(R) through heating, ventilation and air-conditioning ("HVAC") systems to treat harmful pathogens, including airborne viruses.

GICC LLC, based in Bluffton, South Carolina, has recently secured a 36-month contract with the U.S. Government to manufacture and install up to 10 million units of its M3 System(R) in large buildings. The system measures, monitors and contains airborne (aerosol) viruses, pathogens and other biological contaminants.

Holista and GICC LLC concurrently announced that they will form a 51:49 joint-venture company in Singapore which will have the rights to manufacture the M3 System(R) outside the United States. Holista is exclusive global distributor of the M3 System(R) excluding the United States, China and the Gulf states.

Apart from global distribution rights of Path-Away(R) for use as a sanitiser under the NatShield(TM) and Protectene(TM) brands, Holista also has rights to distribute Path-Away(R) for use in aerosolised disinfection of buildings using a high-pressure fogger.

Dr Arthur V Martin, the president of GICC LLC, commented: "To the best of my knowledge, this is the first time a completely natural, all-organic compound has been successfully proven to kill the actual virus causing COVID-19, to 99.9% within two minutes. We are excited because this will allow us to speed up the

InvestorsHub

The screenshot shows the InvestorsHub website interface. At the top, there is a navigation bar with the logo and a "Join iHub today - FREE!" button. Below this is a menu with options like "Boards", "Hot!", "Tools", "Crypto", "Streamer", and "Level 2". A search bar and a "Get Quote" button are also present. The main content area features a navigation menu with "Quote", "Chart", "Level 2", "Trades", "News", "Financials", "Historical", and "Message Board". A search bar for "Holista Colltech Limited (ASX)" is shown with the ticker "ASX:HCT". Below this, the company logo and name "HCT Holista Colltech News" are displayed, along with a "Follow HCT" button. The main headline reads "0.12 Leading U.S. Government-Accredited Lab Confirms Path-Away(R) Natural Active Ingredient Can Kill Actual COVID-19 Virus Within ...". To the right, an "Intraday Stock Chart" for "Holista Colltech (ASX:HCT)" is shown for "Tuesday 20 October 2020". The chart displays price fluctuations between 2000 and 0000 hours, with a price range from approximately 0.12 to 0.16. A red lightning bolt icon and the text "Upgrade to Real-Time" are visible next to the price.
